

Canonical two-player games

Andy Eggers

Formal theory: 1.2

Normal form representation

		Player 2		
		Cooperate	Defect	
Prisoners dilemma	Player 1	Cooperate	3, 3	1, 4
		Defect	4, 1	2, 2

		Player 2		
		Cooperate	Defect	
Assurance game	Player 1	Cooperate	4, 4	1, 3
		Defect	3, 1	2, 2

		Player 2		
		A	B	
Coordination game	Player 1	A	4, 3	2, 2
		B	2, 2	3, 4

		Player 2		
		Cooperate	Defect	
Chicken	Player 1	Cooperate	3, 3	2, 4
		Defect	4, 2	1, 1

		Player 2		
		A	B	
Matching pennies	Player 1	A	1, 0	0, 1
		B	0, 1	1, 0

Payoff plots (à la Bowles)

Strategy profiles

		Player 2	
		(Cooperate)	(Defect)
Player 1	(Cooperate)	(C,C)	(C,D)
	(Defect)	(D,C)	(D,D)

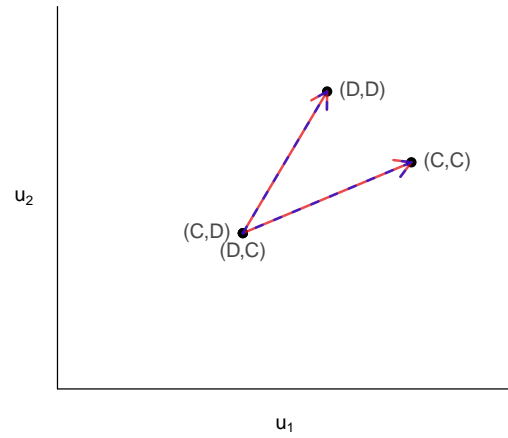

Prisoner's dilemma

Assurance game

Coordination game

Chicken

Matching pennies
